Paper II & Paper III Q & A LIS

A & R

With colour coded answer...

37. Assertion (A) : Extending the library's reach through strategic partnership, collaborative relationship is an important goal for any academic library.

Reason (R) : Partnerships do not allow participating organisations to yield efficiency.

Code :

- (1) (A) is true, but (R) is false.
- (2) (A) is false, but (R) is true.
- (3) Both (A) and (R) are true.
- (4) Both (A) and (R) are false.

38. Assertion (A) : Science rests itself upon a series of postulates or assumptions which are themselves fundamentally unproved and unprovable.

Reason (R) : One can only assert that these postulates are true, can believe them, but cannot prove them as they deal with the validity of human knowledge.

Code :

- (1) (A) is true, but (R) is false.
- (2) (A) is false, but (R) is true.
- (3) Both (A) and (R) are true.
- (4) Both (A) and (R) are false.

39. Assertion (A) : Implementation of TQM in Libraries is quite challenging.

Reason (R) : Some of the key essentials, like open and cooperative culture and employees responsiveness for customer's satisfaction, required for successful implementation of TQM, are very much noticed in a library.

Code :

- (1) (A) is true, but (R) is false.
- (2) (A) is false, but (R) is true.
- (3) Both (A) and (R) are true.
- (4) Both (A) and (R) are false.

40. Assertion (A) : Web 2.0 has wholly wiped out the digital divide, particularly with regard to individual ability, access to and engagement with technology.

Reason (R) : Use of Web 2.0 in learning and teaching is still in an embryonic state.

Code :

- (1) (A) is true, but (R) is false.
- (2) (A) is false, but (R) is true.
- (3) Both (A) and (R) are true.
- (4) Both (A) and (R) are false.

41. Assertion (A) : It is not economical to store and read video data from secondary storage devices.

Reason (R) : Video data require enormous disk storage as image compression ratio is high.

Code :

- (1) (A) is true, but (R) is false
- (2) (A) is false, but (R) is true
- (3) Both (A) and (R) are true
- (4) Both (A) and (R) are false

42. **Assertion (A) :** Participatory action research follows the conventional model of pure research in which members of the communities under study are treated as passive subjects.

**Reason (R) :** In participatory action research no member of the communities under study participate throughout the research process.

**Code :**

(1) (A) is true, but (R) is false.

(2) (A) is false, but (R) is true.

(3) Both (A) and (R) are true.

(4) Both (A) and (R) are false.

43. **Assertion (A) :** The mean is a measure of dispersion.

**Reason (R) :** The mean is based on every observation and is representative of the whole population.

**Code :**

(1) (A) is true, but (R) is false.

(2) Both (A) and (R) are true.

(3) (A) is false, but (R) is true.

(4) Both (A) and (R) are false.

44. **Assertion (A) :** Access to e-collection of a library via Login and password recognition is mostly used than access via IP-address.

**Reason (R) :** Access via IP-address presents a challenge in controlling the distribution of password to non-affiliates.

**Code :**

(1) (A) is true, and (R) is false

(2) Both (A) and (R) are true

(3) (A) is false and (R) is true

(4) Both (A) and (R) are false

45. Assertion (A) : Interlibrary loan departments in libraries will be affected in positive ways by the development of Massive Digital Libraries.

Reason (R) : Because the increased availability of online resources will considerably reduce the need for sending books through traditional mail resulting in the decrease of the workloads of the inter-library loan departments.

Code :

- (1) (A) is true, but (R) is false.
- (2) Both (A) and (R) are true.
- (3) (A) is false, but (R) is true.
- (4) Both (A) and (R) are false.

64. Assertion (A) : The copyright system, born and bred for print technology, faces a technological revolution in its environment.

Reason (R) : The old print technology's broadcast model of one to many communication is replaced with many to many global connectivity.

Code :

- (1) (A) is true, but (R) is false.                      (2) (A) is false, but (R) is true.  
(3) Both (A) and (R) are true.                      (4) Both (A) and (R) are false.

65. Assertion (A) : Avoidance of difficult reference questions are usually an outcome of momentary panic in the face of a seemingly impenetrable question.

Reason (R) : Reference never adhere to few helpful tips such as developing handy-referral systems, both with in and outside the reference area, and fail to establish a context for the questions to counter such panic attack.

Code :

- (1) (A) is true, but (R) is false.  
(2) (A) is false, but (R) is true.  
(3) Both (A) and (R) are false.  
(4) Both (A) and (R) are true.

66. Assertion (A) : In collection development, pamphlets do not require frequent review like books and journals.

Reason (R) : Pamphlet's information value is likely to be short lived, their physical format is usually flimsy and subject to rapid deterioration.

Code :

- (1) (A) is true, but (R) is false.  
(2) (A) is false, but (R) is true.  
(3) Both (A) and (R) are true.  
(4) Both (A) and (R) are false.

67. Assertion (A) : The content-based indexing techniques enable identification of wanted persons in photographs of crowds.

Reason (R) : The content-based indexing system uses all sorts of characteristics of the image to guess what it is about.

Code :

- (1) (A) is true but (R) is false.
- (2) (A) is false but (R) are true.
- (3) Both (A) and (R) are false.
- (4) Both (A) and (R) are true.

68. Assertion (A) : In Gold Open Access, costs are not transferred to authors.

Reason (R) : Gold Open Access journals publish peer-reviewed articles without paid subscription barriers for their readers.

Code :

- (1) (A) is true, but (R) is false.
- (2) (A) is false, but (R) is true.
- (3) Both (A) and (R) are true.
- (4) Both (A) and (R) are false.

69. Assertion (A) : In recent years, QR codes have become ubiquitous and may replace the use of bar codes.

Reason (R) : QR is a two - dimensional code with large capacity for storage. These codes hold information both horizontally and vertically and can be scanned by users with their smart phones at ease.

Code :

- (1) (A) is true, but (R) is false.
- (2) (A) is false, but (R) is true.
- (3) Both (A) and (R) are true.
- (4) Both (A) and (R) are false.

70. Assertion (A) : Librarians usually prefer to provide access to e-content for the users via a proxy server, allowing authorized library users to access content from outside the physical confines of a library.

Reason (R) : Proxy-server access is possible without IP-address recognition.

Code :

- (1) Both (A) and (R) are true.
- (2) Both (A) and (R) are false.
- (3) (A) is true, but (R) is false.
- (4) (A) is false, but (R) is true.

71. Assertion (A) : 'Web Assembly', a standard that enables applications to run securely in browsers (without the use of Plug-ins) is a people-friendly application in using Web.

Reason (R) : A web language transforms the way people use their devices and the web making applications are more accessible to people at ease all over the globe.

Code :

- (1) (A) is true, but (R) is false.
- (2) Both (A) and (R) are true.
- (3) (A) is false, but (R) is true.
- (4) Both (A) and (R) are false.

72. Assertion (A) : Grounded Theory methods in Qualitative research start from same set of assumptions as traditional Quantitative research design.

Reason (R) : The inductive nature of these Grounded Theory methods allows the key issues emerge rather than force them into pre conceived categories.

Code :

- (1) (A) is true, but (R) is false.
- (2) Both (A) and (R) are true.
- (3) Both (A) and (R) are false.
- (4) (A) is false, but (R) is true.

73. Assertion (A) : The fundamental need of a hypothesis is to guide sound research.  
Reason (R) : Without hypothesis, research is focused and do not become a random empirical wandering.

Code :

- (1) (A) is true, but (R) is false.
- (2) (A) is false, but (R) is true.
- (3) Both (A) and (R) are true.
- (4) Both (A) and (R) are false.

74. Assertion (A) : Traditional Knowledge Resource Classification(TKRC) is an innovative structured classification system useful for the systematic arrangement, dissemination and retrieval of all subjects.

Reason (R) : It is structured, based on International Patent Classification.

Code :

- (1) (A) is true, but (R) is false.
- (2) Both (A) and (R) are true.
- (3) (A) is false, but (R) is true.
- (4) Both (A) and (R) are false.
